A People's Resolution for a Green New Deal

Dated 28 March 2025

We, the People's Progressive NextGenerations XYZ, on this 28th day of March 2025, declare our unwavering commitment to addressing the urgent crisis of climate change. We recognize that the health of our planet and the well-being of future generations are inextricably linked.

We stand in solidarity with the principles of the Green New Deal, which seeks to achieve net-zero greenhouse gas emissions, create millions of good-paying jobs, and promote social and economic equity. We applaud the recent passage of the Infrastructure Investment and Jobs Act (IIJA) and Inflation Reduction Act (IRA), which represent significant steps towards investing in clean energy and climate action.

However, we believe that more must be done. We demand that our policymakers prioritize the following:

- **Rapid Transition to Renewable Energy:** We call for a swift and complete shift away from fossil fuels towards renewable energy sources such as solar, wind, and geothermal. This transition must create good-paying jobs and ensure that no worker or community is left behind.
- **Energy Efficiency and Green Buildings:** We urge the adoption of stringent energy efficiency standards for all new and existing buildings. This will reduce energy consumption, lower costs for consumers, and create jobs in the construction and retrofitting industries.
- **Clean Transportation Systems:** We demand investment in clean transportation infrastructure, including public transit, high-speed rail, and electric vehicle charging stations. This will reduce our reliance on fossil fuel-powered vehicles, improve air quality, and create jobs in the transportation sector.

- **Environmental Justice:** We insist that all climate action initiatives prioritize environmental justice. Disadvantaged communities that have historically borne the brunt of pollution and environmental degradation must be at the forefront of the clean energy transition.
- **Indigenous Sovereignty:** We recognize the vital role of indigenous peoples in climate stewardship. We call for full consultation and collaboration with indigenous communities on all climate action initiatives.

We believe that a just and sustainable future is possible. We call on our fellow citizens to join us in demanding bold action on climate change. The time for incrementalism is over. We need a Green New Deal now.

Effective Date: Earth Day 2025
